

| Week | Lec# | Topic | Subtitles | Pages |
|-------------|-------------|---|--|---------------------------------|
| 1 | 1.1 | General Introduction To Molecular Biology | Course description | ----- |
| | 1.2 | Chapter 1: Introduction To Molecular Biology | 1.3: Introduction To Nucleic Acids 1.4: DNA- Hereditary Material 1.5: Watson-Crick Model 1.6: Central Dogma | 5-11 11-14 15-19 19-20 |
| | 1.3 | Chapter 3: Nucleic Acid Structure I | 3.1: DNA Size And Fragility 3.2: Major And Minor Grooves 3.4:DNA Denaturation And Renaturation | 81-82 82-83 84-89 |
| | 1.4 | Nucleic Acid Structure II | 3.4:DNA Denaturation And Renaturation 3.9:Non-B DNA Conformation 3.10: RNA Structure | 84-89 98-102 104-105 |
| 2 | 2.1 | Chapter 4 Molecular Biology Technology I | 4.1 : DNA Isolation 4.2: (Centrifugation And Gel Electrophoresis) | 113, 114 117-120 |

3

| | | | |
|-----|------------------------------------|---|--|
| | | 4.3:Restriction Enzymes | 122, 123 |
| 2.2 | Molecular Biology Technology II | 4.3: Southern Blot 4.3Northern Blot 4.3 Polymerase Chain Reaction 4.3 The Chain Termination Method For DNA Sequencing | 130 132 137 139,140 |
| 2.3 | Chapter 5 Chromosomes I | 5.1-Bacterial Chromatin 5.2:Eukaryotic Chromatin 5.6:Nucleosome 5.8 : The Telomere | 153-155 155 166-168 175, 176, 178 |
| 2.4 | Chapter 8 DNA Replication I | 8.1: General Features Of DNA Replication | 265-273 |
| 3.1 | DNA Replication II | 8.2: Bacterial DNA Replication | 276-293 |

| | | | |
|-----|--|---|--|
| 3.2 | DNA Replication III | 8.3: Eukaryotic DNA Replication | 295-298, 303-306 |
| 3.3 | Chapter 9 DNA Damage & Repair I | 9.1: Radiation Damage 9.2: DNA Instability In Water 9.3: Oxidative Damage 9.4: Alkylating Damage 9.5: Chemical Cross-Linking Agents | 317-321 321-324 324 325 327, 328 |
| 3.4 | DNA Damage & Repair II | 9.7: Direct Reversal Of Damage 9.8: Base Excision Repair 9.9: Nucleotide Excision Repair 9.10: Mismatch Repair | 333-337 337-340 340-342 345-347 |
| 4.1 | Chapter 12 Bacterial Transcription And Its Regulation I | 12.1: RNA polymerase 12.2: Initiation Stage 12.3: Elongation Stage | 408-410 412-418 427-430, 432 |
| 4.2 | Bacterial Transcription And Its Regulation II | 12.4 Transcription Termination 12.5: Messenger RNA 12.6: Lactose Operon | 432-434 434-436 437-444 |
| 4.3 | Bacterial Transcription And Its Regulation III | 12.6: Lactose Operon 12.7: Catabolite repression | 437-444 448-453 |
| 4.4 | Chapter 13 | 13.1: RNA Polymerases | |

| | | | |
|-----|--------------------------------|--|--|
| | Eukaryotic Transcription I | 13.3: Promoter 13.4: General Transcription Factors | 468-471 476-478 478-483 |
| 5.1 | Eukaryotic Transcription II | 13.5: Transcription Elongation 13.6: Regulatory Promoters, Enhancers, And Silencers 13.7: Transcription Activator Proteins 13.10; Mediators | 486-487 489-491 492-493 517, 519, 520 |
| 5.2 | Eukaryotic Transcription III | 13.10; Mediators 13.11: Epigenetic Modification | 517, 519, 520 523-528 |
| 5.3 | Chapter 14 RNA Processing I | 14.1:Pre-mRNA 14.2: Cap Formation 14.3: Splicing | 552-553 553, 555-557 566-575 |
| 5.4 | RNA Processing II | 14.4: Spliceosomes 14.5: Polyadenylation and transcription termination. | 575-579 584-591 |

| | | | |
|-----|-----------------------------------|------------------------------------|----------|
| | | 16.1: introduction to the ribosome | 625-628 |
| | | 16.2: transfer RNA | 628-639 |
| 6.1 | Chapter 16 Protein Synthesis I | 16.3: aminoacyl-tRNA Synthetases | 639-647 |
| | | 16.4; mRNA And The Genetic Code | 649-660 |
| | | 16.5: Ribosome Structure | 660-662 |
| | | 16.6: Stages Of Protein Synthesis | 662, 664 |
| 6.2 | Protein Synthesis II | | |
| | | 16.7 Initiation Stage | 664-676 |
| 6.3 | Protein Synthesis III | | |

| | | | | |
|---|-----|----------------------|------------------------|-------------------------|
| 7 | 6.4 | Protein Synthesis IV | 16.8: Elongation Stage | 677-685 |
| | 7.1 | | Protein Synthesis V | 16.9: Termination Stage |
| | 7.2 | | 16.10: Recycling Stage | 687-688 |
