1.Which statement is correct regarding a wedge-shaped population pyramid?
A. High birth rate, high death rate, low growth rate
B. High birth rate and low death rate, high growth rate
C. Typical of a developed country in evolved demographic equilibrium
D. High birth rate and low death rate, high growth rate
E. Typical of an underdeveloped country in primitive demographic equilibrium

Ans: D

2.Which of the following is from the indoor biological pollutants?
A. Tobacco smoke
B. Carbon monoxide
C.radon
D. Hair of pet
E.non of the above

Ans: D

3.What is the term for eliminating any reinforcement that is maintaining a behavior?
A. Extinction
B. Negative reinforcement
C. Positive reinforcement
D. Punishment

Ans: A

4. What is the term that describes a disease that is imported into a country in which it does not otherwise occur"
A. exotic
B. sporadic

Ans: A

5. Which of the following is correct regarding Adam's theory?
A)Individuals are motivated by performance and the expected outcomes of their own behaviours
B) Individuals are motivated when they perceive that they are treated equitably in comparison to others within the organization
C)By establishing goals and taking action to achieve those goals

Ans: B

6.In Maslow's Hierarchy of Needs, if someone achieves esteem needs, it is expected that they may not necessarily strive to achieve:
A. Employment
B. Belonging
C. Affection
D. Safety
E. Autonomy

Ans: E

7.Which one is not an objective of MCH services?
A. To reduce morbidity and mortality among mothers and children.
B. To reduce the risk of STDs.
C. To reduce domestic and sexual violence without ensuring proper management of the victims.

Ans: C

8. The most sensitive indicator for maternal health..
A. Maternal mortality
B. Weight pregancy
C. Neonatal care

Ans: A

9.Which intervention model is most effective in environmental protection:
A. Clinical intervention,
B.Environmental steward intervention,
C.Public health intervention,
D.All of the above have equal effectiveness
E.None of the above

Ans: B

10. Among the given options, which one is classified as a secondary pollutant?
A. SO3
B. SO2
C. NO
D. NO2
E. CO

Ans: A&D (this question was deleted)

11. according to "The Adolescent Brain" activity the second rapid growing phase of brain
A. 0-3
B. 9-14
C. 3-9

Ans: B

12. which one is human hazard ?
A) microorganisms
B) animal allergens
C) toxic from electrical generation plants
D) insects
E) all are human hazard

Ans: C

13. which of the following is/are correct
I-adequacy is sufficient service to fulfill community demand
II-gender equality is one of the principles of PHC
III-comprehensive medical care covers all problems
A. III&II
B. II
C. II&I
D. III
E. All of them are correct

Ans: D

14. occupational hazards includes?
A. physical
B. chemical
C. biological
D. psychological
E. all of the above

Ans: E

15. which is considered a man made pollutant?
A. power plants
B. all pollutants are man made

Ans: A

16.which isnt a mechanical hazard?
A. falling
B. slipping
C. enstranglement
D. Ionizing radiation

Ans: E

18. Which of the following is related to stress and overwork:
A. Deficiency of vitamin D
B. burnout
C. Team design

Ans: B

19. Cause of periantal mortality (PNM):
A.Sepsis
B. Premature delivery
C.cord prolaps
D. Placental abruption
E.All of them

Ans: E

20. What is true about low brith weight:
A. Doesn't have hiegher mortality in comparison with fetuses of normal weight.
B. They may develop hearing and visual defects.
C. Anemia doesn't cause low brith weight.
D. All are wrong.

Ans: B

21. Internal parts of SWOT
A. Weaknesses & opportunities
B. Threats & strengths
C. strengths & weaknesses
D. Threats & opportunities

Ans: D

22. Mission statement of the organization :
A. Purpose
B. Future
C. Culture

Ans: A

23. Which of the following is an example of hygienes according to Herzberg
A. Responsibility
B. Work condition
C. Achievement

Ans: B

24. What is true about health spectrum:
A. the lowest level of health is positive health
B. The highest level of health is death
C. Human health is subjected to fine variations
D. change between levels is usually sudden

Ans: C

25. On of the following is true realted to poor diet and physical activity reason:
A. Recreational screen time is one of reasons for low prevalence of both insufficient physical activity and disturbed sleep.
B. males have less activity tha females
C. Threats to adequate nutrition may relate to socioeconomic circumstances, lifestyle, eating behaviors and underlying psychosocial factors.

Ans: C

26. What is the foundation component of the framework?
A. Responsive caregiving
B. Good health
C. Opportunities for early learning

Ans: A

27. Which of the following is correct about secondary health care:
A. It is first referral level
B. It is scondary referral level
C. Offer super-specialist care

Ans: A

28.The challenging to diagnose PPD :
A. It start between 2 week and 6 months after delivary
B. Changing in sleep , appetite and excessive fatigue being routine for women after delivary
C. It is major depressive disorder (MDD) with specifier of postpertum onset within 1 month after childbirth

Ans: B

29. One of the followin is not of one of MHC services:
A.reducing unplanned or unwanted pregnanies
B.reducing perinatal and neonatal morbidity and mortality
C.reducing the risk of sexually transmitted disease
D. reducing domestic and sexual violence without proper management of the victims
E. All of them is one of MHC services

Ans: D

30. Which of the following is the best treatment for moderately dependent and high dependent individuals:
A. Nicotine patch and gum
B. Varenicline
C. Bupronpion and patch

Ans: A

31. What month is the influenza vaccine taken in jordan:
A. September
B. October
C. November

Ans: B

32. Which vaccine is given to children
A. Pcv20
B. Pcv13
C. Pcv15
D. Pcv23
E. Pcv17

Ans: c

33. The term that expresses a high level of infection beginning early in life and affecting most of the child population leading to state of equilibrium:
A. Holoendemic
B. Hyperendemic
C. Endemic

Ans: A

34. Which of the following is incorrect about preeclampsia:
A. Family history increases chances
B. develops after 20 weeks gestation
C. can develop into eclampsia which is epiliptic spasms
D. Systolic and diastolic blood pressure reading of >120 and >60 mmHg, respectivly, one time

Ans: D

35. what is incorrect about MMR vaccine?
A. jordan doesn't provide it for girls and women in the vaccine plan
B. because it is attenuated and weakened it can be safely given to pregnant women
C. measles is a infection that commonly affects kids
D. can cause conginital measles

Ans: B

36. which is incorrect about anemia?
A. dilutional anemia happenes when RBC production is much more than plasma production
B. smoking and alcohol is a risk factor for anemia
C. Folate deficiency can cause neural tube defects

Ans:A

37. A realtion ship cause of IPV (intimate partner violence)
A. conflict or dissatisfaction in the family
B. Fear of retaliation
C. Concern for their children

Ans:A

38. what is correct about GDM?
A. GDM is hyperglycemia that develops during first trimester
B. GDM resolves after pregnancy
C. family history of GDM isnt a risk factor
D. GDM doesnt increases chances of developing type 2 diabetes

Ans: B

39. which of the following isnt an aspect of mental health dimension?
A. free from internal conflict
B. self aware
C. good sled control
D. coping with stress
E. self efficacy and self esteem

Ans: E

40. What is the correct order of stages of team development accourding to Tuckman model:
A. Storming, forming, norming, performing, adjouring
B. forming, Storming, norming, adjouring, performing
C. forming, Storming, norming, performing, adjouring

Ans: C

41. whats considered a food contaminant?
A. biological
B. chemical
C. physical
D. all of the above
E. food can never be contaminated if cooked well

Ans: D

42. best nicotine cessation for ischemic heart disease patient?
A. Bupropion
B. Patch+gum
C. behavioral therapy

Ans: C

43. Which of the following is incorrect about ANC:
A. In low and middle income countries, ANC utilization has increased since the introduction of the WHO ANC model, known as focused ANC (FANC)
B. It is planned examination, observation and guidance given to the pregnant woman from conception till the time of labor
C. The first visit or initial visit should be made as early is pregnancy as possible
D. FANC model is associated with more maternal deaths than ANC.

Ans: D

44. Which of the following is correct about Tripod Neglet:

Ans: intersectoral collaboration

45. All of the followin are correct exept:

A. The 73.3life expectancy at birth and fertility rate is 2.8.

B. The top two cause of death for female and male are same in jordan

C. Fertility rate is increased in jordan

46. The mean body weight was compared between sample 1and sample 2. The spss output shows the results. If alpha= 0.1, what is the best interpretation:

Independent Samples Test

		Levene's Test for Equality of Variances		t-test for Equality of Means				
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std Diff
TIME	Equal variances assumed	.130	.729	-2.958	7	.021	-6.0000	
	Equal variances not assumed			-3.000	6.857	.020	-6.0000	

a. We are 90% confident that there is a statistically significant difference in mean body wait between population 1 and population 2.
b. We are 99% confident that there is a statistically significant difference in mean body wait between population 1 and population 2.
c. We are 99% confident that there is NO difference in mean body wait between population 1 and population 2.
d. Levene's test is significant, so assumptions were not met.
e. Reject null hypothesis.

47. The best decision given the following SPSS chi-sauare of the relationship between age group (young, mid age adult, older adult) and depression (depressed or not depressed) is to:

Chi-Square Tests

	Value	df	Asymp. Sig. (2-sided)
Pearson Chi-Square	2.821[a]	2	.244
Likelihood Ratio	2.815	2	.245
Linear-by-Linear Association	.832	1	.362
N of Valid Cases	606		

a. Reject null hypothesis.
b. There is a statistically significant association between age group and depression.
c. Missing data.
d. Keep null hypothesis.
