وصف المقرر المختصر

This course covers health in the world from the aspects of measuring health and diseases in communities and the reasons of their disparities and diseases burden, health equity, culture and health, environmental health, chronic diseases, non-communicable disease, infectious diseases, mother and child health, breastfeeding, nutrition, child development and mental health. The course also covers health systems, health challenges specially to developing and emerging nations with limited resources, health priorities for population groups with diverse cultural backgrounds, catastrophes and emergencies, globalization and health, international human rights, social justice, and international health regulations. Experienced people are invited to give lectures or a variety of interactive activities.

أهداف المقرر

The aim of this course is to equip students with evidence-based and updated knowledge on global health issues, including the demographic and epidemiological transitions, the global burden of disease, the impact of poor health on individuals and communities, and critical issues in the organization and delivery of health services.

مخرجات التعلم CILOs	
المعرفة	
<p>K1. Understand the concept of global health and its relation to public and international health.</p> <p>K2. Gain insight into the major determinants of health and health disparities, including social, economic, and environmental factors, and their impacts on the health of populations.</p> <p>K3. Understand the burden of communicable and non-communicable disease in various regions of the world, including how it varies both within and across countries and regions, and how the disease burden can be addressed.</p> <p>K4. Identify current international collaborations in global health and the importance of global solidarity in humanitarian emergencies.</p>	
المهارات	
<p>S1. Critically analyze and interpret data on health status, disease prevalence, and health outcomes, using appropriate measurement tools and methodologies.</p>	
الكفايات	
<p>C1. Effectively link health policies and management strategies within a comprehensive global health framework.</p> <p>C2. Delineate future challenges and recommendations for dealing with the unfinished agenda in global health.</p>
